DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: The examiner deem claims 1-10 as novel when reads as a whole for the limitations of analyzing a computer program comprising the steps of: defining a plurality of breakpoints for said computer program, at least one of said breakpoints including a respective expected code path condition; and automatically halting execution of said program if said actual code path taken during execution of said computer program *does not match* the expected code path condition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 11-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In regards to claims 11-20, claims a computer program product. Computer listings per se, i.e., the descriptions or expressions of the programs are not physical "things." They are

Art Unit: 2114

neither computer components nor statutory processes, as they are not “acts” being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer, which permit the computer program’s functionality to be realized. Therefore, the specified claims do not fall within the technological arts and therefore, is non-statutory. See MPEP § 2106. As stated in the Specification paragraph 0080, examiner suggests that the applicant amend the limitation “computer program product” by further adding the limitations of “stored on a computer recordable type media to executable set of software instruction for analyzing a developing computer program”.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892.
